Hiring Freeze

Global Tech Giants Announce Hiring Freeze Amid Market Uncertainty

Intel Expects Work Force to Shrink by 25,000

The Silicon Valley chip company, which has been struggling, quantified the job cuts it is making as it seeks to turn its business around.

Microsoft CEO Satya Nadella to 15,000+ employees fired this year: "For that, I am ..."

TOI Tech Desk / TIMESOFINDIA.COM / Updated: Jul 31, 2025, 09:18 IST

[Share](#) [AA](#) [Follow Us](#)

Microsoft has announced another round of layoffs, impacting 9,000 employees, bringing the total to over 15,000 this year. CEO Satya Nadella cited the company's shift towards AI as a driving force, despite strong financial performance with \$25.8 billion in quarterly net income. The gaming division experienced significant ...[Read More](#)

TCS to axe 12,000 jobs; IT giant's biggest layoff ever

Veena Mani & Reeba Zechariah / TNM / Updated: Jul 29, 2025, 09:26 IST

[Share](#) [AA](#) [Follow Us](#)

TCS layoffs: TCS, India's largest IT firm, will lay off 12,261 employees, about 2% of its workforce, due to AI disruptions and uncertain business demand. This significant restructuring aims to transform TCS into a future-ready organization. The job cuts primarily affect mid-level and senior executives, reflecting a strategic shift.

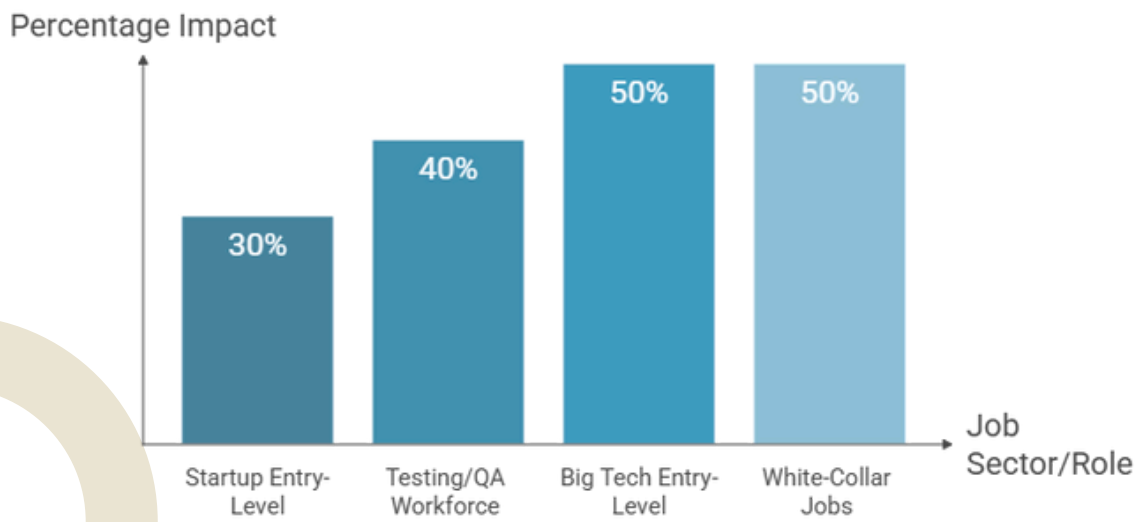

IT salaries hit the brakes! Salary hikes in 2025 may not be what you expect

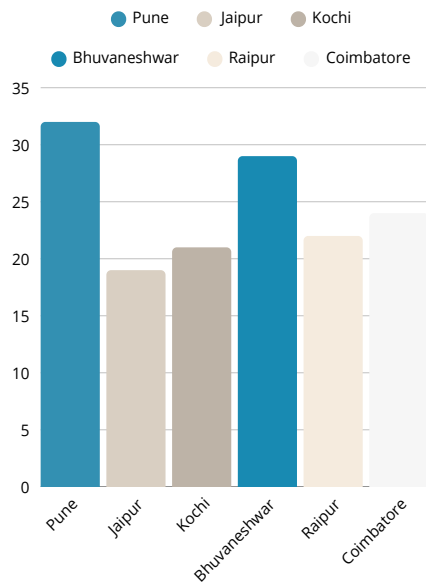

IS THERE DECLINE IN JOBS IN THE MARKET ?

AUTOMATION RISK

+ IMPACT OF AI

1. AI & Emerging Tech: 30–35% projected growth in AI/ML, data analytics, and cloud roles.
2. Critical Tools: Productivity & collaboration (83%), project management (73%), data visualization (64%).
3. Top Freshers Roles in H1 2025: AI Engineer, RPA Developer, Prompt Engineer, Network Security Analyst, Product Analyst.

1. Skill-First Focus: Prioritize AI, data analytics, cloud and RPA certifications; blend with strong soft skills.
2. Career Positioning: Demonstrate hands-on project experience and tools proficiency to offset employability gaps.

1. Software Testing

Reduction:

Manual Testers — AI-driven testing tools (like Testim, Mabl) can automatically generate, run, and update test scripts, reducing the need for repetitive manual QA work.

Increase:

AI Test Automation Engineers — Specialists who train AI models for test coverage and integrate them into CI/CD pipelines.

WHY PREP IS CRITICAL

1. Structural changes in system (entire job categories finished - akin to industrial revolution)
2. Speed of change is unprecedented (skills of today is not very useful tomorrow - new AI tools everyday)
3. Adaptability is necessary (Job security is now an illusion more than ever before)

Learning new skills is critical to adapt
Need to learn beyond books and college

1. Software Testing

Reduction:

Manual Testers — AI-driven testing tools (like Testim, Mabl) can automatically generate, run, and update test scripts, reducing the need for repetitive manual QA work.

Increase:

AI Test Automation Engineers — Specialists who train AI models for test coverage and integrate them into CI/CD pipelines.

WHAT IS THE MOST IMPORTANT SKILL THAT LACKS IN STUDENTS DURING PLACEMENTS?

KEY STATISTICS

42.6% of Indian graduates are employable, down from 44.3% in 2023

1. The Zomato-Style Résumé

Who: An aspiring marketing professional in India.

What they did: Designed their résumé to look exactly like a Zomato restaurant listing — complete with ratings, “delivery time,” “menu” of skills, “reviews” from ex-colleagues, and “special offers” (unique strengths).

Impact: Zomato’s HR team noticed it on LinkedIn and actually reached out, leading to interview calls.

Why it worked: Showed brand awareness, design skills, and humor in a format the company instantly related to.

Summary

- [AWS Certified Cloud Practitioner](#)
- 31 months of experience in Cloud development and Linux/Unix Programming.
- Working with AWS, Containerization Technologies, Microservices, Custom OS creation, and RHEL Package management.
- Trekker and a Traveller. An ardent follower of Cricket and Marathi plays.
- Ex. Executive head of MCLUG(MIT Computers users group) which worked for bridging the gaps between Industry and academia.
- Ex. Chairperson of college Technical fest committee.

Skills

Technical Skills

- Linux system programming, RESTful Web Services, DevOps technologies.
- Containerization Technologies: AWS, Kubernetes, Docker, Django, Apache, VMWare, GIT.
- Operating Systems - Linux, Windows.
- Blockchains - Ethereum, Solidity, Hyperledger.(Basic Proficiency)

Non-Technical Skill

- Team building.
- Technical Tutoring (Have worked as a technical tutor with MCLUG as head of a technical team that conducts sessions for Linux enthusiasts)

Roles and Responsibilities

Persistent Systems Limited / Senior Software Engineer

July 2018 - PRESENT, PUNE

Current Project: Microfocus Voltage Secure Mail

Responsibilities:

- Architecture and development of Microservices based applications developed using Python/Django that expose Rest API endpoints for Outlook client and Chrome Extension's consumption.
- Integration of core encryption algorithm(Identity Based Encryption) for the above mentioned APIs.
- Containerization of the Microservices using Docker technologies. Development of complete Kubernetes infrastructure for the application.
- Deployment of the system on AWS EKS (a managed Kubernetes service) and the complete management on the AWS side. The complete responsibility of managing the AWS system for the project, creating all the staging and production setups, maintaining High Availability, Resiliency, etc for the complete infrastructure.
- Involved in CI/CD workflow creation using Docker technologies and Jenkins CI/CD pipeline. Involved in developing solutions for resiliency, performance, availability, scale-up/scale-out problems.

Education

Maharashtra Institute of Technology, Pune / Bachelor of Engineering, Computer Engineering

August 2014 - July 2018, Pune

Aggregate - 74.66%

Shri Shivaji Science College, Nagpur / Higher Secondary School

August 2012 - July 2014, Nagpur

Aggregate - 84.62%

Bhartiya Vidya Bhavan, Nagpur / Secondary School

August 2009 - July 2012, Nagpur

CGPA - 10 - (96.8%)

Achievements

- Project Mathematics and Tackling Diseases was selected in top 15 projects in the country for 2015-12 by C.B.S.E. at C.B.S.E. National Science Exhibition held in Delhi. The project was also selected for display at Jawaharal Nehru Science Exhibition organized by N.C.E.R.T. in Patna.
- Speaker at Odisha Conference India 2016 held at COEP.
- Successfully organized and managed two national level technical events: "Lunatication2k18" and "Teezaphy-17".
- Winner in BE Project competition in Teezaphy'18.
- Secured First Rank in IDEA PRESENTATION COMPETITION at NATIONAL E-HEALTH CONSULTATION organized by PERSISTENT SYSTEMS LTD. in association with Govt. of India in October 2016.

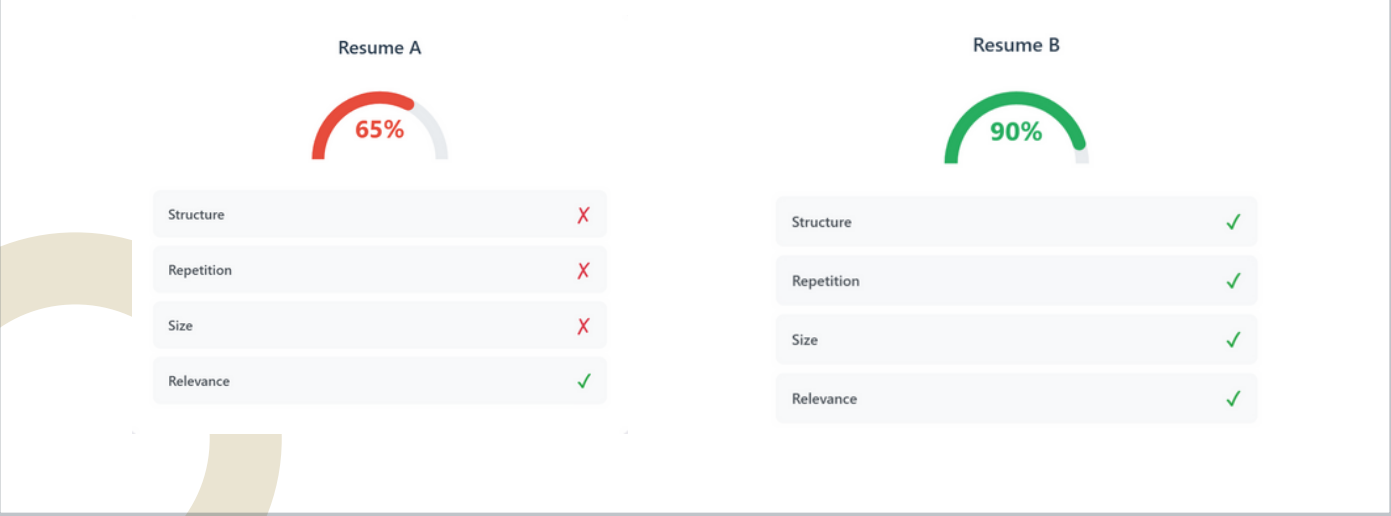

Academic Projects

1. **Blockchain-Based Service Engine for Tangible Asset Management** - It deals with the creation of a service engine for the management of tangible assets i.e. the assets which are transferable and have records.
2. **Mathematics and Tackling Diseases** - This project dealt with the implementation of mathematical analysis on disease-related data and the generation of patterns of progression of communicable diseases.

EDUCATION		
2018	Maharashtra Institute of Technology(MIT), Pune	
• Bachelor of Engineering (Computer Science)		74.29%
2014	Shri. Shivaji Science College(SSSC), Nagpur	
• Maharashtra State Board (MSBSHSE)		84.62% (Top 1% in board)
2012	Bhartiya Vidya Bhavan(BVM), Nagpur	
• Central Board of Secondary Education		CGPA 10.00/10.00
WORK EXPERIENCE		(35 MONTHS)
Jul 2018 - Jun 2021	Persistent Systems Limited, Pune	Lead Software Engineer
Business Impact	• Cloud-Enabled email security product, penetrated individual user market, revenue up \$200K+/yr • Enabled 100K+ Office365 & Gmail users, email encryption capabilities, revenue up \$170K+/yr • Empowered Mac users, email encryption, alleviated compatibility issues, revenue up \$240K+/yr • Collaborated with multiple stakeholders, automated Operations, support escalations reduced 60%	
Product Development	• Engineered resilient processing & networking infrastructure on AWS, handled 1M+ requests/day • Conceived & built encryption processing infrastructure on AWS, saved operating cost \$20K+/yr • Enhanced customer exp., accelerated encryption processing 500%, reduced request time by 80% • Automated product build system, stabilized process, reduced human effort requirement by 35%	
Leadership	• Envisioned containerization strategy, automated cloud orchestration, reduced release time by 40% • Spearheaded plugin-based email client integration on cloud, enabled 5+ platforms & 50K+ users • Led team of 5, conceptualized email sec. product, delivered 30% faster, potential rev. \$300K+/yr • Interviewed 50+ candidates, reduced onboarding time by 30%, expanded team size from 4 to 15	
Jul 2017 - May 2018	Persistent Systems Limited, Pune	Project Intern
AWARDS AND ACHIEVEMENTS		
• Authored research paper, IEEE conference, "Blockchain-based Service Engine for Asset Management", MIT'18 • Bestowed, Annual Top Talent Award, 2 years consecutively, for exceptional performance in team of 75, PSL'20 • AWS Certified Cloud Practitioner, exceptional understanding of AWS services, and its business impact, AWS'20 • Bagged PPO, Persistent Systems, 1/7 in 60+ trainees, "A" grade in Persistent Winter school training, MIT'16 • Gold Medalist, B.E. project competition, Texephyr '18, 1/52, Blockchain-based asset management system, MIT'18 • National Winner, 1/20 of 600+ schools, research project, Disease spread modelling, CBSE National Exhibition'11 • Podium Finish, PSL Bravo Award, stabilized the build process & reduced the product build time by 50%, PSL'19 • INSPIRE Scholar, Dept. of Sci. & Tech., Gov. top 1% /-450K+ in XII, eligible for 80K/yr scholarship, SSSC'14		
POSITIONS OF RESPONSIBILITY		
• Module Lead, Cloud team of 5+, delegated dev. tasks, managed sprint-planning & client communication, PSL'20 • Interviewer & Tech mentor, Microfocus, 50+ candidates, tutored 10+ developers, expanded team to 15, PSL'20 • Executive Head, MIT Computer Users' Group (MCUG), led team of 50+ Tech enthusiasts & mentors, MIT'17-'18 • Knowledge Lead, Linuxication, mentored 1K+ attendees, developed AI, OS & Networking skills, MIT'16-'18 • Technical Mentor, coached 400+ undergraduates in Data & Network Security, Cloud, Version Control, MIT'16-'18 • General Secretary, Texephyr, TechFest, steered team of 150+, led 3+ event department, football 5K+, MIT'17 • Core Team, MCUG, conducted 4+, National level computing workshops, 3 days long, footfall 1K+, MIT'16-'18		
EXTRA CURRICULAR ACTIVITIES		
Technical	• Video Editor, War of Sections, edited & compiled 100+ video bits, online event Aarambh, IIMB'21 • Blogger & owner of Cloud, Networking, Data & API Security website for open source community	
Social Initiatives	• Organizer, 1/20, blood donation & cleanliness drives, NGO Help for Good (HFG), 200+ donations • Mobilized resources, COVID-19, arranged beds, Oxygen, Plasma, NGO HFG, impacted 1000+ lives	
Literary	• Lead Editor, monthly technical Newsletter, 35+ articles, Computer Dept. for one year, MIT'17 • Winner, Best Reader Award, 1/415 students, given by the BVM Readers' Club and Library, BVM'11	
Trekking	• Himalayan Trekker, conquered Sandakphu, 12000 ft., Darjeeling base camp, West Bengal, YHAI'17 • Mountaineer, scaled Chanderkhani Pass, 12010 ft., Manali base camp, Himachal, YHAI'19	

HOW AN ATS COMPARED THEM?

WHAT WOULD MAKE YOUR RESUME STANDOUT?

One Page Only: Keep it concise and impactful

Action + Results: Start with power verbs, end with metrics

Quantify Everything: Numbers make achievements credible

Section Order: Contact → Summary → Skills → Experience

Avoid Vague Words: No "responsible for" or "assisted with"

Tailor Keywords: Match job description terms

WHAT DO WE OFFER

Structured Pathways with Resources

Carefully crafted learning pathways tailored to each student's skill level. These pathways are designed to help students build on what they already know and confidently take the next step in their preparation journey.

Interview Preparation

Interview preparation module to help students prepare specially with soft skills and how to apply the hard skills in a real interview scenario including mock sessions and resume building workshops

Regular Assessments

Varied assessments are created for students to understand where they are with respect to their placement preparation and track their progress regularly.

Industry Relevant Projects

Guided project involving industry relevant problems statements, providing students with the must required processes

MENTORSHIP

WHAT WE PROVIDE

Expert Mentors

Expert Mentors from IIT/IIM with work experience of more than 4+ years in various domains

Mock and Peer Interviews

Group mock interviews for students to get the feel of real interviews and peer interview platform for practice

Community Led Learning

Community based learning where the students educate each other and learn together in a collaborative environment

KEY BENEFITS OF TRAINING WITH STEPSMART

Personalized Guidance

StepSmart offers tailored support to every participant, ensuring that your unique learning needs are met and guiding you toward achieving your personal and professional goals.

Flexible Scheduling

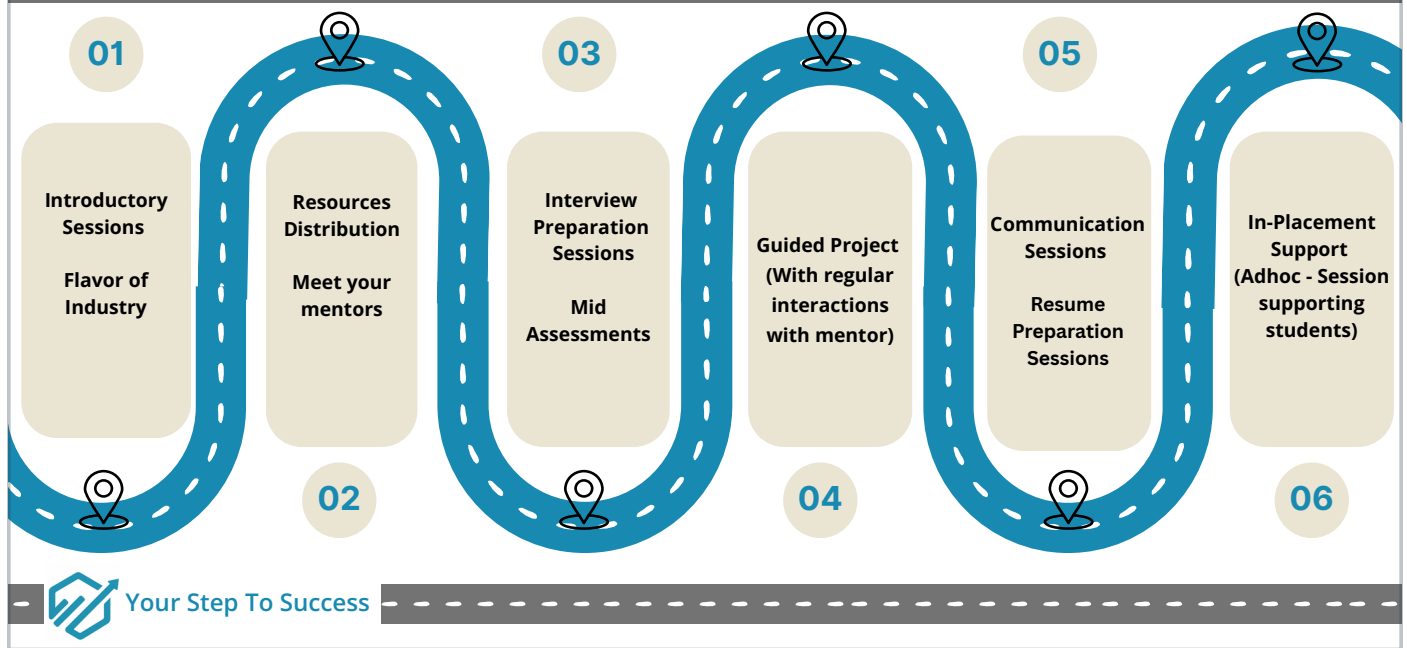

With StepSmart's adaptable training programs, you can choose a schedule that fits your busy life, allowing you to learn at your own pace without compromising other commitments.

Networking Opportunities

Engaging with peers and industry professionals through StepSmart provides valuable connections that can enhance your career prospects and open doors for collaboration in the future.

OUR PLAN OF ACTION

COMPARING STEPSMART TRAINING

Discover the unparalleled advantages of StepSmart over other training programs for your career success.

Personalized Learning

Tailored programs for each individual.

Industry Connections

Extensive partnerships with leading companies.

Success Rates

Proven track record of graduates' achievements.

ADD A CTA

Campys Ambassador

Tata Consultancy Services (TCS) confirmed it could let go of up to 12,000 people this year, which is roughly 2% of its global headcount.

At the same time, HCL announced that junior employees get only a token 1-4% raise in salary, while mid-level employees have yet to get any. Infosys, the once voracious campus recruiter, onboarded just 210 people last quarter.

Microsoft is also laying off thousands of people in its Azure cloud unit. Intel is laying off 24,000 workers
