- 1. Cars24's Strength lies in fast purchase and checkout.
- 2. Spinny is the most sought competitor rising rapidly based on quality of cars but is more costly
- 3. Increasing the user base of casual buyer will boost the revenues significantly

Target User Segments

- Budget Friendly buyers** - Price sensitive casual buyers ,looking for discounts
- Choice based** - Looking for a specific car (Time and budget is not a constraint)
- Urgency buyers** - Looking to buy car asap urgently

KPI TREE

Why Choose Impulsive/ Urgency Buyers ?

- **Challenge** - Urgency buyer wants to buy car as soon as possible with a trust and efficient process
- **Opportunity** - Solving problems for them will solve major pain points of other users as well

User Research and Analysis

Based on the user journey, I’ve identified key pain points and explored them in detail to uncover the root causes. These insights are drawn from app store reviews, social media platforms like Reddit, and personal experience.

Pain Points (Level 1)	Level 2
Finding Car of your choice	1. Limited inventory Availability 2. Where to buy from 3. How to choose which type of car to buy 4. Understanding the state of the car
Fair Pricing	1. Variable price across platforms 2. Varied Discount across same dealership
Trust	1. Incorrect Inspections 2. Minimal support after buying car 3. Incomplete policy and documentation coverage 4. Concerns about scams
Time taken in the process	1. Multiple visits and inspections 2. Documentation and Financing 3. Incorrect listings

User Journey

User journey of a person buying a second hand car, helping us to understand the key touchpoints and factors in the journey

Phase	Discovery & Awareness	Comparison & Consideration	Decision Making	Purchase Checkout	Post Purchases Engagemnt
Actions	• Find the different options where we can buy a second hand car • Identify the budget available • Identify if financing is needed or not	• Check and Compare prices/features • Test drive • Check with mechanics	• Prioritize the features for your second hand car • Confirm the brand and the company you want to buy from	• Make arrangements for financing • Complete documentatio n process • RTO compliances	• Share on Social media • Reviews • Post buying engagement • Maintenance
Emotion s					
Thought s	What are the key features I need for my car ?	Where can I get a better car ? Which company is giving me car with trust and fast ?	Is the car I am buying fulfills all my needs ?	My financing should be done easily, Is there anything which I may have left out for the process ?	I think I bought the coreect car. May be the othercar was good
Touchpo ints	  	  	 	  	  

How does our persona looks likes ?

Vivek

Needs

- Budget friendly options - Affordable and competitive prices
- Looking for good specifications and interior

Demographics & Behaviours

- Age 32 and lives in Pune
- Recently married
- Likes to go out
- IT worker at MNC

Pain Points

- Doesn't understand much about cars
- Limited time to look for multiple cars

Jitesh

Needs

- More Comfort and Safety
- Wants to buy parents and children's
- Mileage should be good

Demographics & Behaviours

- Age 40 and lives in Indore
- Look out for family needs
- First time buyer
- Middle class man , govt job

Pain Points

- Limited discounts
- Does not trust these third party websites
- High rate financing options

Problem Framing Canvas

Who is facing the problem ?

Budget conscious casual users are facing the problem

What is the true problem ?

The true pain point is to understand what kind of a car is needed

Why - Due to lack of car knowledge

Why - First time car buyer

Why - The need or financials are now ready

Is it a real problem ?

As the google statistics suggests **92% of buyers** research online before they buy

Why should we solve it now ?

If we redirect the users from google to Cars24 by **10-20%** the overall traffic will increase leading to increase in cars sold before the competition.

Conversion Funnel

Funnel Stage	Conversion Rate
Total Market (People Seeking Cars)	100%
Site Visits	20%–30%
Inquiries	5%–10%
Test Drive	20%–30%
Cars Sold	10%–20

How does it help ?

Cars24

1. Increased Market Share
2. More traffic to the Cars24

Users

1. Identify the cars they want to buy
2. Brings satisfaction that the car will serve their needs

Solutions

Cars24 Recommender – AI-Powered Personalization

An AI-based feature integrated into the Cars24 app/website that helps users identify the right car based on their specific needs and preferences.

How It Works:

Users will answer 5–7 simple questions like:
What is your budget?
Are you prioritizing fuel efficiency or performance?
Do you need extra seating or storage?
Are you looking for low maintenance or long-term value?

AI-Generated Output:

- ✓ **Recommended Car Types** → Hatchback, Sedan, SUV, etc.
- ✓ Suggested Listings from Cars24 inventory
- ✓ **Third-Party Insights** → Go Mechanic (maintenance reports), OLX (pricing comparisons)
- ✓ **Return on Investment Calculator** → Estimation of future resale value based on usage
- ✓ **Remaining Lifetime Estimate** → Predicted lifespan based on mileage and car condition

Visit24 – Informative Content Hub

A dedicated content section on Cars24 featuring educational and decision-support content to empower users.

Key Features:

- 📺 **Detailed Car Videos** → Walkthroughs of available cars on Cars24 (interior, exterior, performance)
- 📺 **"How to Buy a Used Car" Series** → What to check (mileage, accidents, service history)
- 📺 **Comparison Videos** → Comparing models (SUV vs Sedan vs Hatchback)
- 👤 **Car Mentor Assistance** → Live chat or video consultation with a car expert
- 📝 **Checklist Feature** → Personalized checklist for test drives and car selection

➡ **Visit24 would be preferred solution as it directly solves the user pain points. It helps users to take decision on their own as they trust a human than AI The traffic to Cars24 also increases with this solution.**

Which solution will solve the pain point better ?

Feature	Cars24 Recommender	Visit24
Impact	High	High
Usability	Low	High
Utility	Medium	High
Reach	Medium	High

How It Solves the Problem for CARS24 ?

- ✓ **Increased Organic Growth:**
Educational content will improve Cars24's SEO rankings and increase organic traffic.
Users seeking guidance will be directed to the platform through informational search traffic.
- ✓ **Higher Conversions:**
Mentorship and detailed content will reduce confusion and build trust.
- ✓ **Competitive Edge:**
Human-assisted mentoring = Higher perceived value vs competitors.

How will this solution work for users?

- Impact
- ✓ **Increased user confidence** → Better engagement and higher conversion
 - ✓ **Trust** → More likely to convert inquiry to purchase

What are the Success Metrics to Guage ?

Metric	Definition	Formula
North Star Metric	Market Share	Revenue of Cars24 from used cars/Revenue generated from used cars
Awareness	% Users coming for understanding cars to be bought	No of unique users visiting the “How to buy a used car Series”/Total unique site visits for Cars24
	%Users using the Car Mentor feature	No of users using the car mentor feature/Total unique visitors for Cars24
Engagement	No of videos Shared/ Liked/ Commented from Cars24	No of videos Shared/ Liked/ Commented from Cars24
	Avg time spent per session	Total Time Spend on App/Website / Total Users Visits
Activation	%Users logging in	No of unique users logging in after using the video feature/Total unique visitors for Cars24
	%Users booking test drive	No of users visiting via“How to buy a used car Series” and books test drive/No of users visiting via“How to buy a used car Series”
Acquisition	%Users bought Car	No of unique users visiting via“How to buy a used car Series” and booking Car /No of unique users booked test drive
Safety Metrics	Overall Cars Sold in a year	Total Cars Sold in year (This is important to check that though the new feature increased sales but overall sales have not decreased)

Risks Vs Mitigations

Risks	Mitigations
Low User Adoption	- Search Engine Optimization and Sponsored Ads - Free Mentorship Sessions - Small Crisp Videos/Reels
Competitive threat (feature copy by competitor)	Exclusive feature of live chat with car expert
Less Conversion	Since budget users are looking for discounts, they might move to other market places, provide them rewards points based on enagement which can be used while buying the car

90% of the market is still based on offline market places, but 92% users do a online research while buying a car, through this solution we are directly targeting customers to go to next step of finding a relevant car which can increase the overall cars sold for CARS24
